

# Model A Flyer

Model A Ford Club of NSW Inc

**JUNE 2008**

**Club Meetings** are held at Holroyd Community Centre, Millar St Merrylands. The parking entrance is in Newman Street. Meetings are held from 8 pm on the second Friday of each month unless otherwise stated.

## PRESIDENT'S REPORT

Well, May 2008 has passed in a delightful blur of socializing and travels in our beautiful cars. Before I launch into the news I would like to extend a very warm welcome to our newest members Peter and Di Paice of Singleton and Paul and Denise Cavanagh of Bonnet Bay. We are delighted to have you on board and hope to see you at as many Club outings as possible. Should you need any help or information please call any one of the Committee members whose phone numbers are on the back page.

The biggest news for the Club is that we have joined the rest of the world as we have a web site. You will find the club at:

[www.modelafordclubofnsw.com.au](http://www.modelafordclubofnsw.com.au)

This site is solely the work of Alan Hale of Wyee. Just one meeting ago Alan was not sure if he could do this but just look at what he has achieved. Our site is as good, actually much better than most. There are lots of links to explore, to fill in a wet weekend. According to Alan this is just a beginning and will change from time to time to meet Club needs. Remember this is your Club and your suggestions are always most welcome. We want to give you what you want.

We are now working at putting the Flyer on the site each month. You will soon be asked to elect between receiving the Flyer by mail as usual or whether you will be happy to read it on the web site. Obviously there will be savings to the Club if we can cut back on printing and mailing costs but the choice will be yours. The biggest thank you imaginable goes to Alan for the huge effort he has put into making this possible.

Plans for the President's Run are now in hand. All those who are coming have hopefully booked their accommodation and have started to knit their woollen underwear. If you want me to look out for you, I need to know you are coming. Please let me know what you are doing. I can be contacted pretty much at any time on 0418 611 716. Regarding the tandem skydiving, so far the only person to put their name forward is Nola Bradley. If no one else is interested we may just park our cars in a ring around the spot marked **X** and have a picnic while we wait for her to land.

The cathedral type kick plate protectors for rear mudguards which the Club is having made have suffered a slight delay. Tom Virgona has the matter in hand and hopefully I will be able to let you know costs next month.

The promotional banners being created by Neville Jones look fabulous and we expect them to be up and flying next month. Photos will probably appear on the web site in the near future. There are so many clever people in the Club, just look at what can be achieved when everyone does their bit. You are all spectacular!

Gail Huckstepp has laboured hard all year as the Club Secretary. Gail never commented on my endless demands on her time and provided the Club with efficient and cheerful secretarial services of the highest calibre. Happily for Gail her services have come to an end and together with husband Ron, she is leaving on a series of adventures within Australia. Thank you Gail for all your hard work for the Club, it is very much appreciated. John Hyland has kindly offered to fill in for Gail until the AGM. Thank you John.

I look forward to seeing many of you at the next run. Until then safe driving always.  
Kate Taylor.

### The Club's Web Site

Alan Hale designed and installed the Club's web site which is located at [www.modelafordclubofnsw.com.au](http://www.modelafordclubofnsw.com.au). To show the Club's appreciation we have included Alan and Rhonda Hale's 1931 400A convertible sedan on the home page above.

Our computer literate members should note that there are a large number of photos taken at club events over recent years presented as a slide show on this home page. You or your car may well appear. Hours or even days can be spent looking also at all the information provided through links to other clubs and the links from these clubs to technical articles, suppliers and their catalogues, events and practically every other thing that you can think of concerning Model A's.

Our club's computer illiterate members will hopefully come to realise that there is a Model A world of information now at their doorsteps waiting to be explored. Practically anything you wish to know relating to Model A's can be found. On the left of the home page above is a column of headings labelled - Home, About Us, Newsletter, Membership, Events, Buy and Sell, Photo Album, Links and Contact Us. Selecting the heading Home brings you to what is called home or the first page of the website. Most of the other headings are self evident except perhaps for the heading titled Links. Links are information highways connecting you to other information sites located world wide on the internet. When connected to another web site you are able to explore the information held at that website. Note the word explore as most web sites don't have search facilities and you have to look for yourself.

However a few web sites may have search facilities which will assist in quickly finding the subject matter if held. If you are not internet connected, ask a friend to give you a demonstration of the Club's web site. I am confident that you will be overwhelmed by what is available.

The web site presently has our May 08 Flyer under the heading Newsletter appearing on the home page which can be read and/or downloaded. We are hoping that in time a substantial number of members will elect to view the Flyer on line which will save on printing and postage costs which presently amounts to approximately \$10.20 per member per year. Please let me know by phoning 9484 5116 if you wish however to start next month. Think of the trees to be saved, the reduction in our carbon footprints and the savings in Club funds by looking at the Flyer on our website. Alan Hale has informed me that *'it may take a few weeks before the website begins to populate at Google'* so don't despair if you can't find it immediately.

by Trevor Davis.
